SUMMARY

Architecting cloud-native private cloud and AI infrastructure — previously online banking SRE, social video recommendation and MEC edge platforms, across 7+ years in software and infrastructure.

HIGHLIGHTS

- **Leads teams** Led 5–8 engineers running critical online-banking services at Cathay United Bank; leads projects with 3–5 engineers at MetaMEC.
- **Banking-grade reliability** Ran the critical gateway behind Cathay United Bank's CUBE online and mobile banking.
- **Turns tech into products** Took a MEC edge platform to market; delivers private cloud platforms to enterprise customers.
- **Customer-facing** Technical point of contact for enterprise POCs and proposals.

EXPERIENCE

MetaMEC · Senior Software Engineer | Technical Architect — 2025.08 – Now

Leads a 3–5 engineer project squad

- Architect the Kubernetes private cloud and AI platform
- Lead projects; plan and assign work for 3–5 engineers
- Technical point of contact for enterprise customers, POCs and proposals

`Kubernetes · ArgoCD · Ceph · Harbor · Keycloak · OpenBao · OpenTelemetry`

Cathay United Bank · Site Reliability Engineer | Senior Software Engineer — 2024.09 – 2025.07

Led a team of 5–8 engineers

- Led a 5–8 person team running the critical gateway for CUBE online banking and internal systems
- Moved online banking to the cloud and built a shared OpenTelemetry monitoring module
- Operated OpenShift private cloud and AWS / GCP deployments

`OpenTelemetry · OpenShift · Kubernetes · AWS · GCP · Java · Spring Boot`

Playsee · Senior Software Engineer — 2023.09 – 2024.09

- Designed the personalized in-stream video recommendation service for the home feed
- Built API servers in Go (gin) with Domain-Driven Design
- Kept video data eventually consistent with GCP cronjobs and Pub/Sub

`Go · GCP · Pub/Sub · Bigtable · Spanner · Redis · Elasticsearch`

Alpha Networks · Senior Software Engineer — 2021.09 – 2023.09

- Designed the ETSI / 3GPP MEC edge platform backend and built its API servers in Go
- Built software license management (SLM), RBAC and Kubernetes node management
- Automated platform deployment and CI/CD with Kubernetes, Ansible and GitLab

`Go · Kubernetes · Docker · Ansible · PostgreSQL · Kong Gateway · GitLab CI`

SYSCOM Computer Engineering · Software Engineer — 2019.07 – 2021.09

- Consulted on blockchain projects and system planning
- Worked on an AI image-analysis platform (Kubernetes, YOLOv3) and a Hadoop security analytics system
- Built a containerized HR cloud service on ASP.NET Core

`Java · C# · ASP.NET Core · Python · Docker · Kubernetes · Hadoop`

SKILLS

Cloud Architecture	Kubernetes, Private Cloud, Hybrid Cloud, OpenShift, AWS, GCP, Azure
GitOps & IaC	ArgoCD, ApplicationSet, Helm, Kustomize, Terraform, Ansible, GitLab CI
AI Infrastructure	GPU Scheduling, NVIDIA GPU Operator, AI Platform on Kubernetes, High-Performance Networking
Virtualization & Storage	KVM, VM HA Cluster, Ceph, Harbor
Security & Identity	Keycloak, Dex SSO, OpenBao, cert-manager / PKI, DevSecOps
Observability	OpenTelemetry, Prometheus, Grafana, Logs / Metrics / Traces
Backend	Go, Java, Spring Boot, Python, C#, ASP.NET Core, Kong Gateway, DDD
Data & Messaging	PostgreSQL, Redis, Elasticsearch, Bigtable, Spanner, MongoDB, Pub/Sub

EDUCATION

National Taipei University · M.S., Computer Science & Information Engineering 2017 – 2019

Zhengzhou University · Exchange Student, Information Engineering 2015 – 2016

Ming Chuan University · B.S., Information & Telecommunications Engineering 2013 – 2017
